

SUPPORTING MOTOR MANUFACTURERS &
DISTRIBUTORS

*The Association of
Electrical & Mechanical Trades*

The AEMT is the International Trade Association for companies, who manufacture, import, and distribute, rotating machinery such as electric motors, pumps, fans, gearboxes, and generators, as well as ancillary equipment including drives, switchgear, panels and transformers.

260

Locations

There are over 260 member branches located around the UK.

As a member supplying other AEMT members your company can:

- ✓ promote and network with an international and nationwide network of service centres.
- ✓ attend meetings, and promote your products at events and conferences
- ✓ host your own AEMT meeting at your premises.
- ✓ get listed in the AEMT yearbook and website directory.
- ✓ feature multiple times on the AEMT website. We list your products on distributor's pages and on your own profile page. The website is visited several thousand times a year, as well as featuring high in many google searches.

 Search Google for [AEMT Members](#) to see a map of locations

Local stock and service for your products, nationwide.

AEMT members are situated in over 260 UK locations, as well as 100 locations internationally. They are in regular contact with electrical and mechanical maintenance engineers at production facilities, and utilities nationwide. They will normally provide a 24 hour emergency service to their customers if faced with an urgent critical failure.

By joining the AEMT this network of service engineers is opened up to you. The AEMT will promote you directly to our members ensuring that you have a reliable high quality front-line contact offering service, technical support, and local availability of your products.

Members stock, supply, install, service, and maintain electric motors, drives, pumps, fans, gearboxes, generators, transformers, switchgear, and ancillary equipment.

They have well equipped electrical and

mechanical engineering facilities to service and maintain rotating equipment. Some have panel building facilities and some service and maintain industrial electronic equipment.

The majority of members are able to support the manufacturers and distributors by offering a professional asset management service to their customers, using condition monitoring techniques on motors, pumps, generators and gearboxes. They can ensure the correct installation, and plan maintenance schedules taking into account the results of predictive maintenance and preventative maintenance to minimise downtime.

As a manufacturer or supplier to AEMT members your company can:

- ✓ have a real input on the writing, maintenance, and updating of international standards and relevant directives.
- ✓ take part on committees and steering groups allowing access to the latest developments and updates.
- ✓ request statistics and bespoke surveys for your market research
- ✓ actively promote yourself internationally through the AEMT with Press releases, presentations at meetings, open days etc.
- ✓ advertise for staff on the AEMT web site.
- ✓ make use of the AEMT Legal Helpline provided by Croner with free advice on Legal, Human Resource, Health & Safety, and Tax.
- ✓ enjoy preferential rates on our Hazardous Area training courses on Ex Theory, Repair, Maintenance, and Installation.

Set the standard with the AEMT.

Not only can we offer you access to the industry's largest service centre network, but we also help keep all members up to date with the relevant directives, and international IEC and ISO standards that manufacturers and service centres work to.

The AEMT has representatives on various standards committees for British, European, and International Standards. These currently include the International IEC TC2 for rotating equipment, IEC TC22 for power electronics, EXL031 Equipment for Explosive Atmospheres, and IEC TC14 for Power Transformers.

The AEMT represents members' interests with the relevant government bodies particularly DEFRA, The Environment Agency, Department of Trade and Industry, Health and Safety Executive, etc. and liaises with them on behalf of members. In Europe it has been active with the Eco-design and other relevant Directives.

As a manufacturer who refurbishes or repairs Ex products in house, the AEMT:

- ✓ promotes safety in zoned hazardous areas
- ✓ represents members on the international IEC 60079 series of Ex standard committees
- ✓ provide Ex theory and hands-on training courses
- ✓ provides a technical support helpline
- ✓ has published many supporting documentation and reference books

ATEX & IEC Ex

A Brief History

In 1984 the AEMT in conjunction with BEAMA produced the first BEAMA/AEMT “Code of Practice for the Repair and Overhaul of Ex Electrical Apparatus” with input from the major users of Hazardous Area Equipment, and the Health and Safety Executive.

It was subsequently adopted with only minor changes as the British and European Standard BS EN 60079 19, and International standard IEC 60079 19. It is recognised as the standard to which Hazardous Area equipment should be repaired and overhauled.

Since 1984 the AEMT has supported delegates from the repair industry, as well as personnel from major Oil companies, Manufacturing companies, Chemical companies, and Gas and Water treatment companies from around the world.

Ex Registered Companies

The Ex Register promotes member

companies meeting the requirements of BS EN and IEC 60079 19 for the repair of Hazardous Area equipment. It is widely used internationally by companies with hazardous area equipment seeking high quality repairs, and is promoted widely by the Association.

Help & Reference

The AEMT website can be a fantastic resource for Ex Repairers. Free to download is our Ex Labels and Reference Data book, tables and charts for ATEX notified bodies and ATEX Nampelate Information.

For anything that can't be found, by using the AEMT Members helpline, answers can be found to almost any problem.

For those listed on the Ex Register visit: www.ex-register.com

WEG on supporting the AEMT Awards 2017:

Marek Lukaszczyk
Marketing Manager European
& Middle East
WEG UK

“WEG are very keen to promote industry in the UK and by supporting this exciting new event from the AEMT, we feel it gives us the opportunity to help establish this association as one of the most active in the UK. Our experience with the AEMT is a very positive one and we are sure this event will cement our relationship and help the industry move forward to tackle the challenges of the future”.

Don't just take our word for it...
